1. Additional Information: Add the attached aerial photos showing existing conditions and proposed finished grades at the corners of the concrete slab and asphalt driveway. This information is provided to allow contractors to accurately determine cut and fill quantities based on the cross-section designs provided with the bid documents.
2. The attached building plan view shows the areas of the concrete slab inside of the building that are required to be repaired according to the repair design details provided with the original Invitation for Bid (IFB).
